PROFESSIONAL SUMMARY

Results-driven Computer Science Engineer (Cloud Computing) with hands-on experience in Software Development, Cloud Engineering, Full Stack Web Development, Backend Development, AI-powered applications, NLP, DevOps, and Cloud Infrastructure. Strong knowledge of designing, developing, testing, deploying, and maintaining scalable web applications using Python, JavaScript, React.js, Node.js, HTML5, CSS3, SQL, MongoDB, MySQL, AWS, Docker, Kubernetes, Jenkins, Terraform, Git, GitHub, CI/CD, REST APIs, Machine Learning, NLP, Prompt Engineering, and LLMs. Demonstrated success through internships and practical projects across software development, web development, cloud, AI, and data visualization.

CORE COMPETENCIES

Software Development | Full Stack Development | Backend Development | Frontend Development | Cloud Computing | Cloud Engineering | DevOps | REST API Development | Microservices | AI Applications | Machine Learning | NLP | Prompt Engineering | LLM Integration | Database Design | SQL Development | AWS Cloud | Docker | Kubernetes | Jenkins | Terraform | CI/CD | Git/GitHub | Agile | SDLC | OOP | Data Structures & Algorithms | Debugging | Unit Testing | Problem Solving | Team Collaboration | Technical Documentation.

TECHNICAL SKILLS

Programming: Python, JavaScript, C++, SQL | **Frontend:** HTML5, CSS3, React.js, AngularJS, Bootstrap, Responsive Web Design | **Backend:** Node.js, REST APIs, API Integration, Authentication, CRUD Operations, PHP | **Databases:** MySQL, MongoDB, SQL, Database Design, PSQL | **Cloud:** AWS, Cloud Computing, Cloud Architecture, Virtualization, Cloud Deployment | **DevOps:** Docker, Kubernetes, Terraform, Jenkins, Git, GitHub, CI/CD, Version Control | **AI/ML:** NLP, LLMs, Prompt Engineering, Whisper.cpp, Gradio, Ollama, Machine Learning, Speech-to-Text, Text Classification, Power BI | **Core CS:** OOP, Data Structures, Algorithms, Operating Systems, Computer Networks, Software Engineering, System Design Fundamentals.

PROFESSIONAL EXPERIENCE

WEB DEVELOPMENT Intern — **20 September- Present**
Zidio Development — Remote

Data Visualization Associate Intern(Team Lead) — **03 August 2026- 03 Sept 2026**
Excelerate — *Remote*

- Joined as a Data Visualization Associate Intern to work on data visualization and related analytical initiatives.

HTML/CSS Developer Intern — **February 2026 – March 2026**
Clinchlogic Technologies — *Remote*

- Developed responsive and cross-browser compatible web pages using HTML5 and CSS3.
- Created reusable UI components following modern web standards.
- Improved website responsiveness and user experience.
- Optimized page layouts for multiple screen sizes.
- Collaborated with developers to integrate frontend components.
- Fixed UI bugs and improved website consistency.
- Participated in code reviews and debugging activities.
- Followed Agile development practices.

HR Recruiter — **November 2025**
Fintech Flow — *Remote*

- Managed complete recruitment lifecycle and sourced candidates through multiple recruitment platforms.
- Screened resumes according to job requirements and conducted preliminary interviews.
- Coordinated interviews with hiring managers and maintained recruitment reports and hiring documentation.
- Managed onboarding processes and improved recruitment workflow efficiency.

Project Intern — **June 2025 – July 2025**
IBM

- Worked on software development projects, participated in requirement gathering, and developed project modules.
- Performed testing and debugging while following SDLC and Agile methodologies.
- Collaborated with team members, maintained technical documentation, and implemented efficient software solutions.

Web Developer Intern — **January 2025 – March 2025**
Wayspire Ed-Tech Pvt. Ltd.

- Developed responsive web interfaces and user-friendly frontend components.
- Improved UI/UX experience, participated in application testing, and worked with HTML, CSS, and JavaScript.
- Collaborated with development teams.

Java Developer Intern — **June 2024 – July 2024**
InternPe

- Developed Java applications and implemented Object-Oriented Programming concepts.
- Solved programming problems, optimized application performance, and debugged software issues.
- Received Letter of Recommendation for outstanding performance.

Campus Ambassador **June 2024 – August 2024**

Tripple One Solutions (Course Yard Pvt. Ltd.)

- Organized student engagement activities, promoted technical learning initiatives, and conducted awareness campaigns.
- Strengthened leadership and communication skills.

LEADERSHIP & ACTIVITIES

Team Leader – Social Internship, Aikarthya: Led a team, managed planning and execution, mentored students, coordinated educational initiatives, and created structured learning resources. **Events Core Committee Member, UPES ACM & ACM-W Student Chapter (November 2023 – June 2024):** Planned technical events, coordinated workshops, managed event execution, and served as Event Head for Prodigy Lenslore.

PROJECTS

AI Powered Meeting Summarizer — Python, Whisper.cpp, LLMs, NLP, Gradio, GitHub. Built an AI-powered meeting summarization platform; converted speech into structured summaries; extracted action items; applied NLP; integrated Whisper.cpp; used LLMs; developed an interactive Gradio interface; improved productivity through automation.

Travel Hive — Python, JavaScript, HTML, CSS. Developed a social platform for solo travelers with authentication, messaging, and group management; improved performance and reduced page loading time by approximately 20%.

Agile Bug Tracker — HTML, CSS, JavaScript, Python. Built a complete bug tracking system with Agile workflow, bug prioritization, status tracking, issue ownership, and improved project collaboration.

Network Bottleneck in Virtualized Platform — Simulated network bottlenecks, analyzed cloud infrastructure performance, proposed optimization techniques, and improved throughput analysis.

Fake News Detection — Python, Machine Learning, NLP. Developed a fake news detection system using text preprocessing, feature extraction, classification models, and accuracy improvement techniques.

EDUCATION

Bachelor of Technology (B.Tech.) – Computer Science Engineering (Cloud Computing) **2022 – 2026**

University of Petroleum and Energy Studies (UPES) *CGPA: 7.8/10*

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Academy Cloud Architecting
- Advanced Web Development – Microsoft Learn
- Python Developer – Udemy
- Use AI Responsibly – Google
- Discover the Art of Prompting – Google
- Introduction to Artificial Intelligence – Google
- Maximize Productivity with AI Tools – Google
- AWS Innovate Week Certificate
- SQL (Advanced) – HackerRank

ACHIEVEMENTS

Successfully completed multiple internships across Software Development, Cloud Computing, Web Development, Android Development, Java Development, and Recruitment; built multiple production-oriented software applications; developed AI-based NLP applications; worked with Cloud, DevOps, and Full Stack technologies; received Letter of Recommendation from InternPe; led technical and social initiatives demonstrating leadership and collaboration skills.
